LIGHTFASTNESS
 +++ = at least 100 years lightfast under museum conditions
 ++ = 25 - 100 years lightfast under museum conditions
 + = 10 - 25 years lightfast under museum conditions
 The lightfastness has been tested in accordance with ASTM Standards D4303.

Talens Art Creation acrylic colour is available in 38 colours. These colours are available separately in tubes of 75ml and 200ml and pots of 750ml. Complete sets are also available of 12ml tubes with 8, 12 or 24 colours.

The colours are easy to mix and you can work on many different grounds as long as they are free of grease and dust and sufficiently absorbent. Examples are, of course, canvas and paper. Plaster, board, wood, stone and cement are, however, also good grounds.

ACRYLIC

For the artist in you.

Some degree of painting talent hides within all of us. Regardless of the type of paint you choose and what you are planning to paint, you can simply pick up a brush and discover your own creative possibilities. All you need is good material to work with.

In addition to acrylic paint, Talens Art Creation provides various other techniques such as oil paint, water colour and gouache. But as an artist you, of course, need more than just the right paint. Talens Art Creation provides auxiliary products that are useful for all artists. These include canvases, brushes, painting accessories and artists' easels.

Talens Art Creation acrylic colour is a modern and versatile type of paint based on 100% acrylic resin. The paint is pasty, has a silky gloss when dry and can be painted over quickly. Talens Art Creation can be used both straight from the tube and thinned with water. The paint is waterproof when dry. The drying time of acrylic colour is short. It is often less than an hour, depending on the thickness of the paint layer.

Every start is difficult. Certainly when it comes to making your own painting. So don't make it too complicated for yourself at the beginning. Let yourself be inspired by your surroundings, think of a still life or use a photo you can copy.

But above all: dare to try. Good luck!

On www.royaltalens.com you will find comprehensive information and inspiration to help you on your way. You can find, for example, step-by-step plans, information on mixing colours, different painting techniques, etc.

For the artist
in you.
